

Strata® DK Technical Bulletin

TBDK-0002
April 15, 1997

Page 1 of 2

Strata DK424 Installation and Programming

The enclosed pages update your manuals for the Strata DK424 system. The Strata DK424 has the same features as the Strata DK280 Release 3.1, but the addition of the RCTUE/F processor increases capacities. Instructions for various configurations of the DK424, T1 interface, Automatic Call Distribution, and the PC Attendant Console are included in this package. New product ID cards are provided for each binder.

Change bars indicate where information has been revised.

Strata DK Installation and Maintenance Manual

This manual was updated in February 1997 with bulletin TB16-0003, which provided additions and corrections to the DK16e information.

Please add or replace the following pages with the enclosed pages in your *Strata DK Installation and Maintenance Manual*, Version A (Part Number DKA-MA-IN/MT-VA).
